- **Backend:** Node JS
- **Databases:** Mongo DB
- **Tools / Platform:** Git & Github, VS Code, Postman

Work Experience

Intern in KVR Analytics | Front-end Developer, BDE

27 Feb 2023 – 23 Sept 2023

Internship Project: Development of Login, Signup, and CAPTCHA Pages

- **Login Page:** Developed a responsive login page using HTML and CSS, ensuring compatibility across various devices and browsers. Implemented input validation to enhance security and prevent unauthorized access.
- **Signup Page:** Designed and implemented a user registration page allowing new users to create accounts securely. Employed form validation techniques to ensure accurate user input and minimize errors during the signup process.
- **CAPTCHA Integration:** Integrated CAPTCHA functionality into the signup page to prevent automated bots from creating fake accounts. Utilized CAPTCHA services to generate and validate unique challenges, enhancing the overall security of the registration process.
- **Tech Stack Used:** HTML, CSS, JavaScript, React JS

Projects

1. Portfolio - React.js Development

- My Project Portfolio, developed using React.js, is a culmination of my expertise in web development and digital creations. Utilizing React.js component-based architecture, I crafted a sleek and dynamic interface that showcases a diverse range of projects with seamless navigation and engagement.
- In summary, my Project Portfolio not only demonstrates my technical proficiency in React.js but also reflects my creativity, attention to detail, and dedication to delivering high-quality web solutions.
 2. **Currency Exchange:** HTML, CSS, JavaScript, RestApi
 3. **Netflix Clone:** HTML, CSS
 4. **Todo-List:** React JS
 5. **Tic Tac Toe:** HTML, CSS, JavaScript
- These all projects are committed in my GitHub account.

Academic and Extracurricular Achievements

- I'M Professional Nodal Level Chess Player.

Hobbies

Chess, Football, Photography
